

## **Problem Statement**

There is not enough attention being placed on the lack or availability of public transportation to University of South Carolina students who may need it.

## **Details**

There is not enough attention being placed on the lack or availability of public transportation to University of South Carolina students. Many students for one reason or another do not have their own mode of transportation within and around campus and the rest of the city, which I myself also do not have. This has created situations where it's difficult to take advantage of further opportunities. However, as I learned I was, these students who need transportation to and from places may be misinformed of opportunities available to them.
